SUMMARY

Results-driven MERN Stack Developer with +2 years of experience building scalable, secure, and user-focused web applications using MongoDB, Express.js, React.js, Node.js, and TypeScript. Strong hands-on experience in REST API development, authentication and authorization, CMS-driven workflows, third-party integrations.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Redux, HTML5, CSS3, SCSS, Tailwind,Responsive UI, Component-Based Architecture ui
Backend: Node.js, Express.js, RESTful APIs, Server-Side Logic, Authentication
AI, DevOps & Tools : Generative AI, LLMs, Open Ai, Git, GitHub, Postman, Figma, Docker, AWS, Webflow
Database: NoSQL, MongoDB atlas, Firebase, redis
Professional Skills: Problem Solving, Quality Focus, Deadline Management, Team Collaboration

EXPERIENCE

Digipine Infotech LLP, Gandhinagar, Gujarat Apr 2026 – Present
(Software Engineer)

- Developed and maintained scalable React.js, TypeScript modules for an ERP system, leveraging TanStack Query for efficient server-state management, reducing unnecessary API calls by 40%.
- Built reusable, type-safe UI components and business workflows using @void-snippets, accelerating feature development by 60% while ensuring code consistency across modules.
- Optimized application performance through lazy loading, memoization, and efficient state management, improving page responsiveness and reducing render time by 30%.
- Integrated secure REST APIs with React, implementing caching, optimistic updates, and error handling using TanStack Query, reducing data synchronization issues by 50% and enhancing user experience.
- Collaborated with backend developers to integrate complex ERP modules, implementing role-based access control, dynamic forms, and real-time data updates, improving overall development efficiency.

FlutterTop Web And App Development Bhopal, Madhya Pradesh March 2024 – March 2026
(MERN Stack Developer)

- Developed and deployed production-grade web applications and Webflow-based solutions with custom CMS structures, scalable architecture, and optimized layouts, improving page load performance by up to 40% .
- Solved Webflow platform limitations (complex business logic, scalability, dynamic data handling) by integrating MERN Stack (MongoDB, Express, React, Node.js) with TypeScript, using Webflow as a headless frontend.
- Built custom JavaScript and TypeScript solutions (webflow.js) to handle dynamic UI behavior, animations, form validation, API communication, and conditional rendering without breaking Webflow editor functionality.
- Built secure REST APIs for authentication, CMS sync, and third-party integrations, reducing manual effort by 60%.

PROJECT

1. **Axonic** – Built intelligent REST APIs with OpenAI integration for hesitation detection, emotion analysis, opportunity matching, ATS score estimation, and resume template personalization.

2. **SaaS platform** – Architected a multitenant BYOC SaaS platform unifying WhatsApp Business API, Twilio SMS, and voice channels into a single interface - onboarding 15+ business tenants.

3. **Matrimonial** – Developed a rule-based matrimonial platform that matches profiles based on predefined preferences, eligibility criteria, and compatibility rules.

EDUCATION

University Institute of Technology, RGPV, Bhopal Aug 2019 – July 2023
Bachelor of Technology CGPA: 7.77

CERTIFICATION

MERN Stack Development
Sheriyans Coding School
